

How to update the app and reload the file

Addressed to ACI Test Users

Install Fulfillment Heartbeat 1.0 (310) from TestFlight, then reload Heartbeat Daily Report.xlsx so the new Pre-Sub OOS item rows show on the scorecard.

New in this build

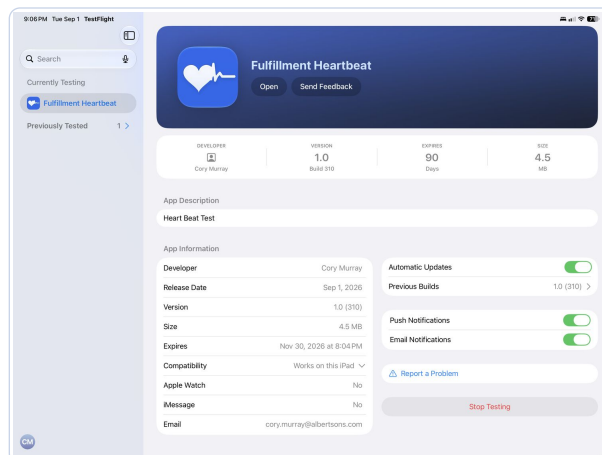

Pre-Sub OOS Items now sit under the store table on Pre-Sub OOS ScoreCard. After you update and reload, tap that blue banner to see item-level Pre-Sub %, units, and dollars. Page filters apply to the item table.

Part 1 — Update in TestFlight

- 1 On the iPad Home Screen tap TestFlight (blue windmill). Open Fulfillment Heartbeat under Currently Testing.

Home Screen — TestFlight and Heartbeat.

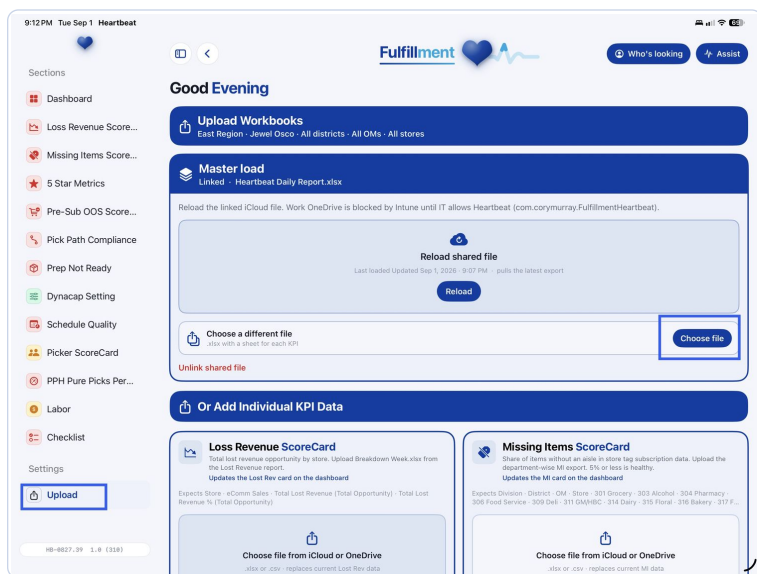

- 2 If the button says Update, tap it and wait. If it already says Open, you are on 310. Leave Automatic Updates on. Do not tap Stop Testing.
- 3 Open Heartbeat. The sidebar stamp must read HB-0827.39 1.0 (310). That is the build with Pre-Sub OOS Items.

Part 2 — Reload the master workbook

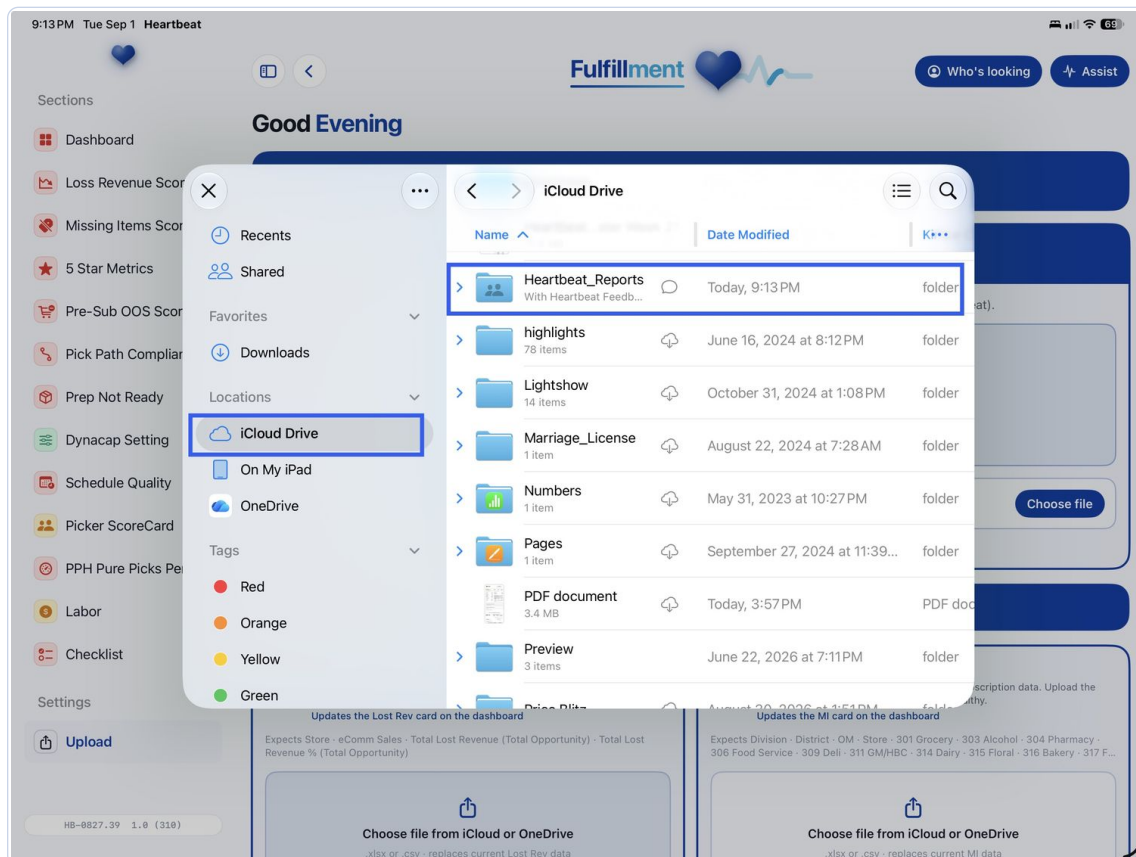

Work OneDrive is blocked by Intune on unmanaged iPads. Use the shared iCloud file: Heartbeat Daily Report.xlsx in the Heartbeat_Reports folder.

- In Heartbeat tap Upload in the left sidebar. On Master load tap Choose file to pick the shared workbook, or Reload if it is already linked.

Upload → Master load. Choose file or Reload.

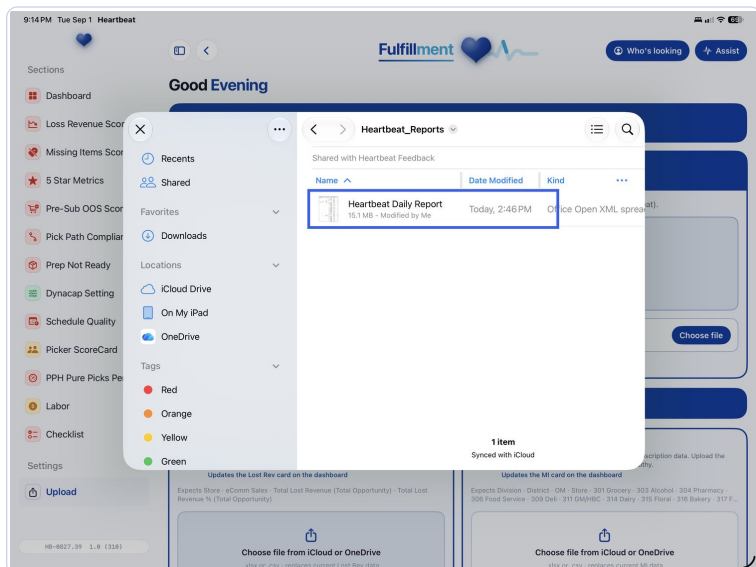

- In the file picker tap iCloud Drive, then open Heartbeat_Reports.

iCloud Drive → Heartbeat_Reports.

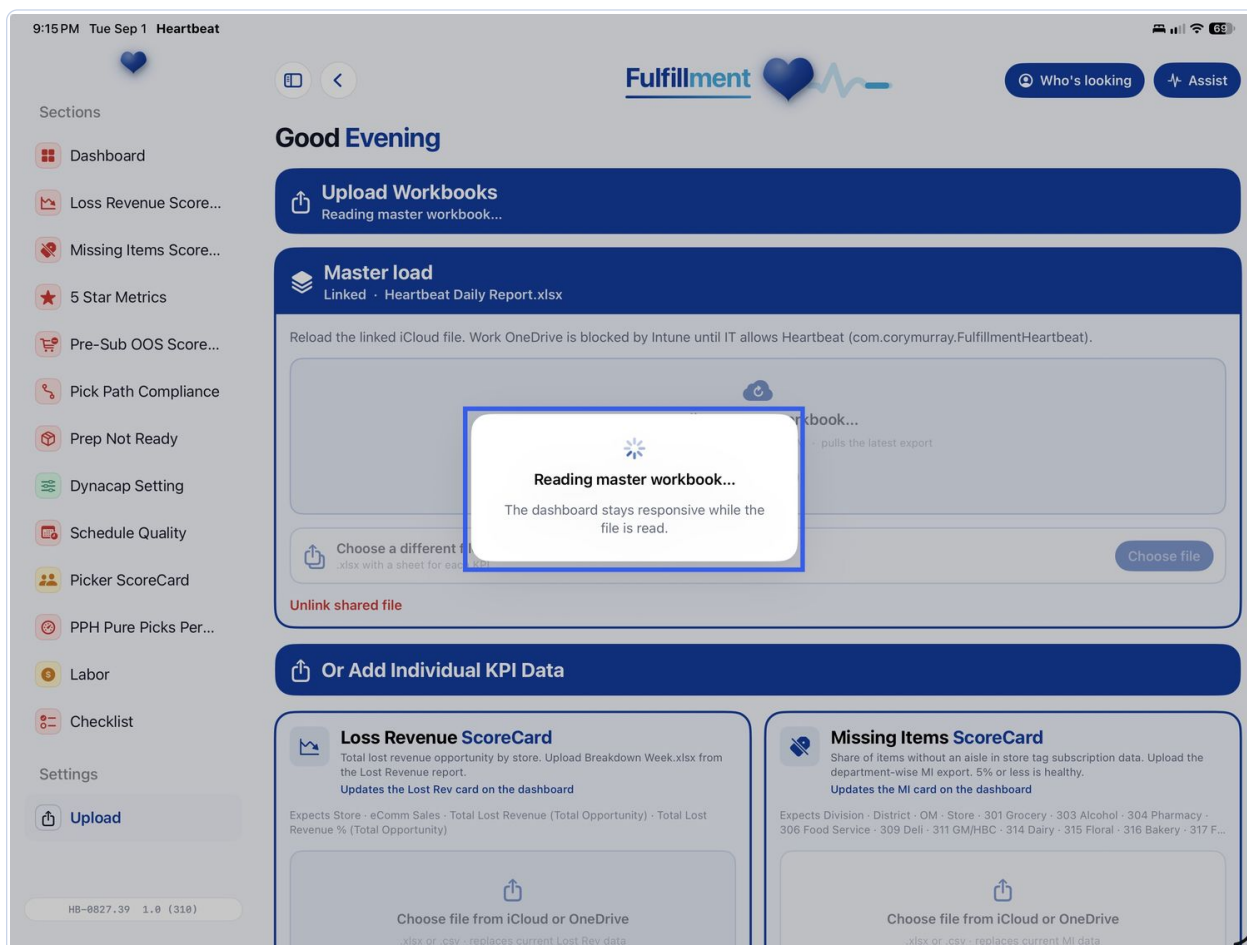

Part 2 — Select the file and wait

- 6 Tap Heartbeat Daily Report. This folder is shared with Heartbeat Feedback so every tester uses the same workbook.

Tap Heartbeat Daily Report.xlsx once.

- 7 Wait for Reading master workbook. When it finishes you go to Who's looking. Pick your role, then open Pre-Sub OOS ScoreCard.

Reading master workbook — leave the iPad on this screen until it finishes.

Part 3 — Pre-Sub OOS item breakout

The page still starts with Markets or Districts and the store table. Under the stores is a second blue banner: Pre-Sub OOS Items. It stays collapsed until you tap it.

What you should see on build 310

- Banner count matches loaded items (example: 3,469 items).
- Tap the banner to expand. Columns: Store, Item (BPN DESC), Pre-Sub %, Units, \$ Pre-Sub, OOS %, \$ OOS, Status.
- Tap any column header to sort. Status pills are At risk, Watch, or Healthy.
- Region, Division, District, OM, and Store filters apply to this table.
